

Harness the Power of 24/7 Threat Protection

MyCloud Managed Security

STAY AHEAD OF EVOLVING CYBER THREATS

Cyber threats don't take breaks and neither should your security. From ransomware and phishing to insider risks and unpatched vulnerabilities, today's threat landscape is constantly evolving. Without the right protection in place, even a single gap can lead to costly breaches, compliance failures and operational disruption.

As a fully managed, turnkey solution, MyCloud Managed Security is configured, monitored and optimized by our experts, so you can protect your organization without burdening your IT team.

MEET MYCLOUD MANAGED SECURITY: YOUR ALWAYS-ON SECURITY OPERATIONS TEAM

MyCloud Managed Security combines Guided Vulnerability Management and MDR to deliver continuous protection across your endpoints, network and cloud environments.

SOLVE YOUR CYBERSECURITY CHALLENGES

- ✓ **Detect Threats Before They Escalate**
Continuous monitoring identifies suspicious activity in real time across your entire environment.
- ✓ **Prioritize & Fix Vulnerabilities Faster**
Know what to fix first with expert-guided remediation and automated patching options.
- ✓ **Protect Remote & Hybrid Workforces**
Secure endpoints, VPNs and user activity, no matter where your employees work.
- ✓ **Eliminate Blind Spots & Shadow IT**
Discover unmanaged assets and hidden risks before attackers do.
- ✓ **Simplify Compliance Requirements**
Stay audit-ready for HIPAA, PCI DSS, SOC 2, and more with built-in reporting and documentation.

WHO BENEFITS FROM MYCLOUD MANAGED SECURITY?

Small & Mid-Sized Businesses (SMBs)

Gain enterprise-grade protection without the cost or complexity of building an in-house SOC.

Healthcare & Regulated Industries

Maintain continuous compliance while protecting sensitive data and patient information.

Financial & Retail Organizations

Secure transactions, protect customer data and reduce breach risk.
